

# REVIEW OF GENERATION TECHNOLOGY IN ALBERTA

## EDC ASSOCIATES LTD.

Helping electric industry participants  
optimize their energy consumption ,  
procurement, and investment decisions...

An EDC Multi-Client Study

For release in Q3 2007

### Inside this study:

- Analysis of Operating and Financial Results for Recently Developed Generation
- A Probabilistic Review of Planned Projects Underway in Alberta
- Overview of Generation Cost Pressures
- Quantitative and Qualitative Assessment of a Variety of Most likely Generation Technology Development over the next 5, 10, and 15 Years

## Table of Contents

<b>Executive Summary</b> .....	<b>5</b>
<b>Review of Operating Results for Current Alberta Generation</b> .....	<b>6</b>
Alberta Generation Capacity.....	6
Forced and Maintenance Outages.....	6
Historical Forced Outage Rates.....	6
Historical Scheduled Maintenance Patterns.....	6
Generation Availability.....	6
Coal.....	6
Natural Gas.....	6
Wind.....	6
Hydro.....	6
Imports.....	6
Generation Energy Production.....	6
Estimated Generator Revenues.....	6
Energy.....	6
Ancillary Services.....	6
<b>Existing and Proposed Supply Projects in Alberta</b> .....	<b>7</b>
Highly Likely Near Term Projects.....	7
Projects under Construction.....	7
Projects with EUB Applications/Approvals.....	7
Probable Longer Term Additions.....	7
Coal.....	7
Gasified Coal.....	7
Natural Gas.....	7
Windfarms.....	7
Interconnections.....	7
Small-scale Hydro.....	7
Possible Longer Term Additions.....	7
Nuclear Plants.....	7
Northern Hydro.....	7
Other Supply Resources.....	7
<b>Drivers for Investment Choices in Alberta</b> .....	<b>8</b>
Lifecycle Costs.....	8
Capital Costs.....	8
Operating Costs.....	8
Other Costs.....	8
Cost Pressures.....	8
Rising Labour Costs.....	8
Rising Material Costs versus Appreciating Canadian Dollar / Other Currencies.....	8
Environmental Policy Costs.....	8
Other Fuel and Technology Choice Drivers.....	8
Environmental Policy Risk.....	8
Market Needs.....	8
Market Risk.....	8
<b>Alberta Supply Scenarios</b> .....	<b>9</b>
Possible Near Term Supply Additions.....	9
Wind Capacity.....	9

Peaking Capacity .....	9
Cogeneration Capacity .....	9
Long Term Resource Possibilities .....	9
Baseload.....	9
Renewable.....	9
Peaking.....	9
Interconnections .....	9
Other Resources.....	9
Potential Market Impacts .....	9
Will the Supply Mix Change Appreciably? .....	9
Price Level and Volatility.....	9
On Peak / Off Peak Price Spreads.....	9
Environmental Emission Intensity Levels.....	9
<b>Appendix .....</b>	<b>10</b>
