

Putting It All Together!

Please join us at the 2010 Coordination Workshop

Together, CASA and the AAC work hard on air quality issues. As Alberta moves toward a new approach to environment management, we all have questions about how it'll work! At this co-sponsored Coordination Workshop, we'll help you *put it all together!*

At this one-day workshop, you will:

- hear the latest news about the **Clean Air Strategy**
- learn more about the the Federal **Comprehensive Air Management System**, the **Integrated Monitoring, Evaluation & Reporting Framework** and the **Cumulative Effects Management Framework**
- understand how the **Alberta Water Council**, the **Land Use Framework** and the **Alberta Airsheds Council** priorities could relate to CASA projects
- learn more about air quality feedback received by the **ERCB** at hearings over the past few years
- learn what other **CASA project teams** are doing, with possible linkages and synergies

Register now at www.casaconferences.org!
